

Byelex Crypto Services

Lamassu ATM Quickstart

With our Lamassu ATM you can easily buy or sell your Bitcoins or Ether. Simply tap "I want Bitcoin", scan the QR code of your Bitcoin wallet and insert the desired amount of money in the machine and the Bitcoins are transferred immediately to your wallet. (Ethereum is not fully supported yet we're working on this.)

On the High Tech Campus in Eindhoven it is also possible to sell your Bitcoins or Ethers and get legal tender in return.

Digital Mobile Wallet

If you do not have a digital mobile wallet yet, you can install one easily and for free! We recommend the Coinbase (Bitcoins and Ether) or Blockchain (Bitcoin only) wallets, they can be downloaded from the Google Play Store and Apple App Store.

The wallets are optimised for mobile devices and are very easy to use. Visit the website of coinbase and Blockchain to learn more about their products and crypto currency in general.

Locations

Currently we have two locations in the Netherlands where you can make use of the Lamassu ATMs

- ▶ [Brasserie Tivoli, Oudenbosch](#)
- ▶ [High Tech Campus, Eindhoven](#)

ATM Issues ?
